## PRESIDENT

Skills: R&D teams' management, project management, mass production, development of innovation.

### EXPERIENCES

---

- Since 2002*      **LISA Airplanes.** Initiator of the project and co-founder of the company.
- 1998 to 2002*      **Valéo - DAV** car parts manufacturer (Annemasse),      **Technology Director** in the Network Division. My missions were to supervise and lead the R&D teams (40 persons), the development of network business, the build up of the technological Road Maps and the management of innovative projects.
- 1992 to 1998*      **Valéo Electronique**, car parts manufacturer (Créteil).  
**97-98 Hardware workmanship Executive**  
I coordinated the engineers and electronics technicians of the Group Valéo on the career aspects (technical synergy, recruitment).  
**93- 97 Program Manager** for the electronics products line (100 MF) for the inner client Valéo Lighting, with a multidisciplinary team including sales, design, quality, purchase and production skills.  
**92-93 Project Manager.** I lead the BALLASTS development team for the Xenon lamp. I started this strategic project for the Group and carried it to mass production integrating new technologies.
- 1990 to 1992*      **Somelec (50pers)** in Le Pré St Gervais. **Design Executive** for power converters for the Defense and for the lighting industry.
- 1988 to 1990*      **Techniphone** in Aix en Provence. **Engineer of studies.** In the power electronics department, I invented equipments for energy conversion for the French Navy.

### FORMATION

---

- 1993*      Training in Management CEDEP at the **INSEAD Business School**
- 1988*      **D.E.S.S** (equivalent Master Degree) in **Power Electronics** ENSEEIHT- INPT Toulouse.
- 1986 -1987*      *Military Service at the air base of CAZAUX.*
- 1986*      **Maîtrise & Licence** (equivalent Bachelors Degree) in **Automotive Electrotechnics Electronics** University Paul Sabatier Toulouse III.
